**About The Asian Banker 500 (AB500) program**

Now in its ninth year, AB500 is an annual study of the financial and business performance of the commercial banking industries in 21 countries across the Asia Pacific region. The study comprises two different rankings: the first ranks the top 500 banks in the region by size, while the second ranks the same 500 banks by strength (ie. an evaluation that is based on a belief that a strong bank demonstrates long-term profitability from its core businesses). Bank annual reports and statistics provided by central banks or industry associations are key sources of data in the study.

**About the rankings**

The AB500 Largest Banks ranking assesses Asia Pacific's leading 500 banks by asset size. Besides total assets, the AB500 Strongest Banks ranking also takes into consideration the banks' balance sheet growth, risk profile, profitability, asset quality and liquidity in its analysis.
