

HK Order Types

1. Limit Order (LO)

A Limit Order having a price equal to the best opposite orders will match with opposite orders at the best price queue residing in the system, one by one according to time priority. When you place a limit order, you are stating the price at which you wish to buy or sell a stock, if that price is not met; your order will not be executed and will be placed in queue.

For buy order, if the input price is below the ask price, the order will be on queue (allow to key within 24 price spreads).

For sell order, if the input price is above the bid price, the order will be on queue (allow to key within 24 price spreads).

2. Enhanced Limit Order (ELO)

ELO is similar to the limit order except that it will allow matching of up to **ten price queues** at a time. The bid order price of ELO can be input at 9 spreads lower than the current bid or the ask order price can be input at 9 spreads higher than current ask price. Any unfilled quantity of ELO after matching will be converted in the system as a normal Limit Order at the input order price.

Example: To buy 200k OCBC @ ELO 63.25

Match up to 10 levels 150K @ Average Price
Balance 50K will be on queue @ 63.25
Buy order @ 63.30, it will be rejected

	Ask Price	Ask Quantity	
1	62.80	20K	} 150k
2	62.85	20K	
3	62.90	20K	
4	62.95	10K	
5	63.00	10K	
6	63.05	10K	
7	63.10	10K	
8	63.15	10K	
9	63.20	20K	
10	63.25	20K	
11	63.30	10K	

3. Special Limit Order (SLO)

A SLO will match up to **ten price queues** (eg. The best price queue and up to the 9 spreads away) as long as the traded price is not worse than the input limit price. Any unfilled quantity of SLO after matching will be cancelled and not stored in the system.

Example: To buy 200k OCBC @ ELO 63.25

Match up to 10 levels 150K @ Average Price
Balance 50K will be cancelled
No limit to order price

	Ask Price	Ask Quantity	
1	62.80	20K	} 150k
2	62.85	20K	
3	62.90	20K	
4	62.95	10K	
5	63.00	10K	
6	63.05	10K	
7	63.10	10K	
8	63.15	10K	
9	63.20	20K	
10	63.25	20K	
11	63.30	10K	

4. At-Auction Limit Order (ALO)

An at-auction limit order is a limit order with a specific price. An at-auction limit order with a specified price at or more competitive than the final IEP may be matched at the final IEP. Any unfilled at-auction limit orders will be converted into limit orders and carried forward to the Continuous Trading Session provided that the specified price of that at-auction limit order does not deviate 9 times or more from the nominal price.

5. At-Auction Order (AO)

An at-auction order is a market order without a specific price and is entered into the trading system for execution at the final IEP. It enjoys a higher auction matching priority than an at-auction limit order. It will be cancelled automatically before the commencement of the Continuous Trading Session.
